Thank you Dan.

I guess the results look like I suspected they would. I will share this only with my family. Again, I thank you for keeping me in the loop.

Have a nice weekend,
Trip

Trip,

The attached report is not for publication as EPA has just received the "Draft" Report from GeoEngineers for their review. EPA is to review prior to finalizing the report and making it public according to the agreed EPA Work Plan, but I thought you will keep this to yourself.

I will be forwarding you the Final Report ... probably next week or week of October 1st.
